

Philo - Bug #118

this raw ID field seems unnecessarily large

- Status changed from New to Feedback

- Assignee changed from Stephen Burrows to Joseph Spiros

In the past, Joseph has expressed concern regarding the (valid) possibility that someone someday might want to use Philo in conjunction with a model that used a non-integer primary key field. In order to handle this possibility, it is necessary to have text fields for generic relations... and text fields are represented like that in the admin. Currently, only Julian does this; rather than eliminating the feature, it might be worth considering expanding it to, for example, nodes.

#2 - 06/14/2011 11:11 AM - Joseph Spiros

- Status changed from Feedback to Closed

Indeed, I agree, it may be worth expanding this to other models, rather than removing it.

#3 - 06/14/2011 11:13 AM - Joseph Spiros

- Status changed from Closed to Rejected

Oops, I guess this should be rejected, not merely closed.
