Target version:			
Description			
The following styles are missing or odd in murano: - modelmultiplechoice field styles. - compositefield error styles. - invalid textarea styles			

History

#1 - 04/06/2011 07:54 PM - Joseph Spiros

The ModelMultipleChoice field uses SuperBoxSelect, and I do not want to continue using that into the future, as it does not come with styles for the gray and access built-in themes. I would like us to write our own field that uses styles that should exist in any ExtJS theme so that we have compatibility with all themes.
