

Philo - Bug #126

Bug # 128 (Resolved): Initial versioned release

Bug # 127 (Resolved): Documentation for initial release (and beyond)

Docstrings for core functionality.

04/26/2011 04:38 PM - Joseph Spiros

Status:	Resolved	Start date:	04/26/2011
Priority:	High	Due date:	
Assignee:	Joseph Spiros	% Done:	90%
Category:	Core	Estimated time:	0.00 hour
Target version:			
Description			
As part of our effort to document Philo properly, I'd like us to write Sphinx-formatted docstrings for all public APIs in core (meaning, everything except the contrib apps). As a guide, see how I've documented source:contrib/gilbert/extdirect/core.py@f314a8ddceb543e2bb4711d50bdd2060452689b1 .			

History

#1 - 04/26/2011 04:41 PM - Joseph Spiros

- Parent task set to #127

#2 - 05/13/2011 08:18 PM - Stephen Burrows

- Status changed from New to In Progress

- % Done changed from 0 to 80

Core docs are done for everything except the admin interface. To a certain extent, the admin is not really "public" - should we document it anyway?

#3 - 05/13/2011 08:21 PM - Stephen Burrows

Also, so that I don't forget: there's a slight issue with documenting `philo.models.File.file` and `philo.models.nodes.TargetURLModel.reversing_parameters` - both raise `AttributeErrors` when an attempt is made to access them, which means the docstrings are inaccessible.

#4 - 05/23/2011 04:05 PM - Stephen Burrows

- Assignee set to Joseph Spiros

- % Done changed from 80 to 90

Finished docstrings last friday - just need stylistic comb-through.

#5 - 06/14/2011 11:09 AM - Joseph Spiros

- Status changed from In Progress to Resolved

Marking as resolved for now. Obviously we'll need to maintain these as we go into the future.
