

## Philo - Bug #134

**entity\_class\_prepared should not provide any args.**

<b>Description</b> Currently, the entity_class_prepared signal purports to send a "class" argument. However, no such argument is supplied or needed, since the class is already available as the signal sender. Interestingly, django's class_prepared signal has the same issue; however, I don't think that is a reason for us to do so as well.
