

## Philo - Feature #155

### TemplateFields should behave like Templates

06/09/2011 04:05 PM - Harris Lapiroff

<b>Status:</b>	New	<b>Start date:</b>	06/09/2011

<b>Target version:</b>			
<b>Description</b>			
TemplateFields that they should have a render method that behaves like a template render method. A complication is that TemplateFields store a template code string instead of as a NodeList the way that Templates do, but perhaps a TemplateField could store both a code string and a NodeList and update the NodeList when the string is changed.
