

Philo - Bug #179

Unable to create multiple Entity subclasses with the same name

10/17/2012 01:26 PM - Joseph Spiros

Status:	Resolved	Start date:	10/17/2012
Priority:	High	Due date:

Target version:			
Description			
An error occurs with the attribute_set GenericRelation on Entity when two subclasses of Entity are created (in different apps) with the same class name. That is to say, if I have class A(Entity) in one app, and class A(Entity) in another, the second one will not make it through Django model validation.

Revision 1fb47744 - 10/17/2012 01:52 PM - Joseph Spiros

Added a proper related_name argument to the GenericRelation from Entity to Attribute. This fixes #179.
