

Philo - Bug #181

Error in entity forms with Django 1.5

06/10/2013 02:41 PM - Harris Lapiroff

<b>Status:</b>	New	<b>Start date:</b>	06/10/2013

<b>Target version:</b>			
<b>Description</b>			
Looks like as of 1.5 <a href="#">this line</a> raises this error:			
<pre>54.         if c.__metaclass__ != ModelFormMetaclass:</pre>			
<pre>Exception Value: type object 'ModelForm' has no attribute '__metaclass__'</pre>			
Seems like the code needs to be updated in light of <a href="https://code.djangoproject.com/ticket/14082">https://code.djangoproject.com/ticket/14082</a> being resolved. This bug does prohibit sites that use the Django admin from being updated to 1.5 since this code gets called when admin.autodiscover() runs.
