

Philo - Bug #65

Migrating forward to mptt fails automatic tree rebuild

11/30/2010 04:45 PM - Stephen Burrows

Status:	Closed	Start date:	11/30/2010
Priority:	Normal	Due date:	
Assignee:	Stephen Burrows	% Done:	0%
Category:	Core	Estimated time:	0.00 hour
Target version:			
Description			
It seems that migration 0009 may not correctly implement forced tree rebuilds - at least for south with MySQL. When the tree rebuild is attempted, the columns (tree_id, etc.) do not yet exist in the database. This may be related to MySQL transaction support/handling - requires more testing.			

History

#1 - 01/05/2011 09:54 PM - Stephen Burrows

- Priority changed from High to Normal

This isn't really urgent, as the number of sites running philo is fairly small. Also, I'm not entirely clear on whether south migrations are meant to be included in repositories. I think it may be meant as the responsibility of individual developers to maintain their own migration history...

#2 - 01/27/2011 09:43 PM - Stephen Burrows

- Status changed from New to Closed

Since we're planning on removing all migrations when we make an alpha release, it doesn't make sense to spend time trying to correct this.
