

Philo - Bug #8

Adding a Page reloads the add form.

08/03/2010 06:01 AM - Kriti Godey

Status:	Resolved	Start date:	08/03/2010
Priority:	Normal	Due date:	
Assignee:	Joseph Spiros	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
When I add a Page, and click either "Save" or "Save and add another", it says "Your page has been added, you may continue editing it below." When I do it a second time, it works the way it supposed to.			

Associated revisions

Revision 247ff613 - 08/18/2010 10:00 PM - Stephen Burrows

Tweaked page add_form template. Fixes bug #8.

Revision 60a1df9c - 08/19/2010 04:02 PM - Stephen Burrows

Re-tweaked page add form to preserve 'continue on normal save' functionality. This is implemented with javascript and will probably break some time in the future, but there doesn't seem to be a better way to do it at the moment. Fixes bug #8.

Revision e06925fc - 08/20/2010 09:21 PM - Joseph Spiros

Merge branch 'master' of git://github.com/melinath/philo

- 'master' of git://github.com/melinath/philo:
Re-tweaked page add form to preserve 'continue on normal save' functionality. This is implemented with javascript and will probably break some time in the future, but there doesn't seem to be a better way to do it at the moment. Fixes bug #8.
Tweaked page add_form template. Fixes bug #8.
Moved templateform to forms.py in preparation for experimentation with page forms.
Added collapse classes to attribute and relationship inlines on entities.
Added template code validation to the admin. This essentially addresses bug #14 by catching errors with validation on templates instead of letting it show up as a server error later. (Note that there should still be better validation on Pages, as deletion of a template say on the filesystem could render a db-driven template invalid.)
Set TreeModel slug field length to 255 to match Titled

History

#1 - 08/18/2010 10:01 PM - Stephen Burrows

- Status changed from New to Feedback
- Assignee set to Joseph Spiros
- % Done changed from 0 to 100

Addressed by commit [247ff6137449d1d4ae0c35d27048b11157e7b183](#). The <input name='_continue'> was forcing it back to the edit page.

#2 - 08/19/2010 02:39 PM - Joseph Spiros

- % Done changed from 100 to 0

The solution in [247ff6137449d1d4ae0c35d27048b11157e7b183](#) defeats the purpose of a custom template which was created so that that clicking "Save" should work the same was as "Save and continue editing" when adding a new page. The solution should maintain this functionality.

#3 - 08/19/2010 04:03 PM - Stephen Burrows

- Status changed from New to Feedback
- Assignee changed from Stephen Burrows to Joseph Spiros

New solution: Use js to remove the hidden input if the form is submitted as "add another". Commit [60a1df9c4f1df657cee19951a87f781b0e2bf85a](#).

#4 - 08/20/2010 10:13 PM - Joseph Spiros

Confirmed fixed in [60a1df9c4f1df657cee19951a87f781b0e2bf85a](#).
