

Philo - Bug #80

Tests have fallen out of date

Description			
After the node refactor, the tests are no longer exactly correct. This is basically just a matter of changing the expected results. It might also be worth adding some tests for the <code>construct_url</code> method.

Revision ae74849c - 05/31/2011 05:16 PM - Stephen Burrows

Corrected philo tests and removed all use of penfield models in those tests - resolves issue #80. Minor correction to `TreeModel.get_path` to save a query.

Revision ac8a3258 - 06/02/2011 09:22 PM - Joseph Spiros

Merge branch 'master' of [git://github.com/melinath/philo](https://github.com/melinath/philo)

- 'master' of [git://github.com/melinath/philo](https://github.com/melinath/philo):
 - Implemented the solution proposed to #130 - removed `TreeModel` and made a `SlugTreeEntity` subclass of `TreeEntity` to handle `Node` and `Template`. Correctly subclassed `SlugTreeEntity.Meta` so that `Node` and `Template` actually have the unique constraints they are meant to. Minor correction to `TreeEntity.get_path`.
 - Minor corrections to `TagCreation.js`. Resolves issue #125.
 - Switched contentlets to use lists rather than sets to preserve ordering. Resolves issue #132. Added some basic tests for containers. Moved `build_extension_tree` out of `Template.containers`.
 - Minor correction to `FeedView` docstrings. Resolves issue #139.
 - Refactored `RequestNodeMiddleware` to use `SimpleLazyObject` - comparable to `django r16297/r16305`. Resolves issue #144.
 - Corrected philo tests and removed all use of penfield models in those tests - resolves issue #80. Minor correction to `TreeModel.get_path` to save a query.
 - Added a 'getting started' tutorial and a short intro to philo page to the docs. Improved `Attribute` docstring.
